Waterproof DVR Kit with GPS and Night Vision Camera –V8G

Overview

V8G is a new waterproof DVR Kit, which is packed with advanced GPS feature so you can record not only the video but the location as well. V8G has a 2.5inch TFT color display built-in to allow you to play all recorded video anywhere. The video resolution of is up to 640*480 at frame rate 30fps.All vide clips would be saved onto the SD card up to 32Gb with high quality audio which is very clear. Besides the GPS function, the high capacity built-in batteries is another reason that makes V8G stand out, which can support the system recording continuously for about 6 hours! The DVR Kit comes with professional GPS/ Video analyzing software, and accessories such as waterproof and night vision camera, special DVR bag, rechargeable batteries, power adapter and more. Besides, the operation and menu system are very easy and user friendly, which makes it an ideal recording device for policeman, security man, etc.
